

GoSecure Helps the World's Largest Manufacturer and Distributor Of Thread And Sewing Supplies Answer The Question – Are We Secure?

GOSECURE

CASE STUDY

COATS GROUP PLC

THE CHALLENGE

Coats Group PLC was building a new cybersecurity practice and needed both tools and expertise to answer the question “Are We Secure?”

THE SOLUTION

By installing a suite of GoSecure Titan Managed Detection and Response (MDR) capabilities, Coats saw immediate results including the detection and quarantine of three systems containing malware that had previously gone undetected.

WHY GOSECURE

The GoSecure Titan platform offers visibility and control that helps Coats cybersecurity leadership “sleep better at night” knowing systems are more secure.

When Benjamin Corll, VP of Cybersecurity and Data Protection / Chief Information Security Officer joined the Coats Group PLC he faced a significant challenge – answer the question “Are we Secure?”

The Coats Group is the world’s largest manufacturer and distributor of sewing thread and supplies, and the second-largest manufacturer of zips and fasteners. Founded in 1755 in Paisley, Scotland, this global firm has more than 17,000 employees in 50 countries today.

Starting from scratch, Corll knew he would have to invest in both people and tools to build a security practice, while being cost conscious and getting the most skilled help possible. He also knew he wanted to implement a foundation for his new organization built on a Managed Detection and Response (MDR) solution suite. Having worked with GoSecure at a previous company, Corll knew where to turn for the experienced people and effective tools he needed at Coats.

Coats implemented a GoSecure Titan MDR solution with 6,500 endpoints, and support for up to 8,500, that includes:

- GoSecure Titan Endpoint Detection and Response (EDR)
- GoSecure Titan Network Detection and Response (NDR)
- GoSecure Titan Next Generation Anti-Virus (NGAV)

Like many GoSecure clients, Coats started with their endpoints by deploying the EDR solution. Appliances were installed at their hub sites. They quickly detected and quarantined three systems with malware that previous software had not detected. Within the next half-year, Corll added NGAV to their solutions.

"After many conversations during the review process with different team leaders, I realized how focused and knowledgeable the (GoSecure) team was and that our organization would not just be a number, but a partner with a name."

Benjamin Corll
VP of Cybersecurity and Data Protection /
Chief Information Security Officer

COATS GROUP PLC

Industry: Manufacturing

Employees: 17,000 World-wide

GoSecure Solutions:

- GoSecure Titan Managed Detection and Response (MDR)
- GoSecure Titan Endpoint Detection and Response (EDR)
- GoSecure Titan Network Detection and Response (NDR)
- GoSecure Titan Next Generation Anti-Virus (NGAV)

The results of GoSecure's solutions have been obvious to Corll. "The great visibility and control helps me sleep better at night with peace of mind that we have broad visibility and control - and that 6,500 of our systems are secure."

For Coats Group, a long-term relationship with GoSecure means having the experienced professionals, proven security tools and customer-focused support needed to deliver for their organization. "I have been most impressed with the continued growth and improvement of the GoSecure portfolio with enhanced functionality and capabilities. Plus, GoSecure people understand the entire enhanced suite," remarked Corll.

ABOUT GOSECURE

GoSecure is a recognized cybersecurity leader and innovator, pioneering the integration of endpoint, network, and email threat detection into a single Managed Detection and Response service. The GoSecure Titan platform delivers predictive multi-vector detection, prevention, and response to counter modern cyber threats. Our Titan MDR is designed to detect and respond in less than 15 minutes, delivering rapid response and active mitigation services that directly touch the customers' network and endpoints. For over 10 years, GoSecure has been helping customers better understand their security gaps and improve their organizational risk and security maturity through MDR and Advisory Services solutions delivered by one of the most trusted, skilled and experienced teams in the industry.
