GOSECURE CYBERSECURITY ASSESSMENT (CSA)

Get quick, actionable insights to understand cybersecurity posture, drive security strategy and determine the return on investment for security tools.

Security organizations are facing unprecedented challenges in today's threat landscape to prepare for both known and unknown threats across a wide and ever-growing attack surface. The best foundation your team can build begins with a comprehensive assessment.

A Cybersecurity Assessment (CSA) delivered by the expert multi-disciplinary advisory services team at GoSecure will help you understand your potential vulnerabilities, deliver actionable recommendations for your security roadmap and provide a clear evaluation of your security posture to detect and respond to threats challenging organizations like yours today.

A GOSECURE CSA WILL:

- Offer a multi-faceted review of security posture based on organization complexity, industry, environment and other factors
- Provide clear visibility into the state of your security controls

- Show if your security technologies are delivering the value you need
- Help you create a security roadmap based on the needs of your organization

CMMI SCORING DELIVERS CLEAR MATURITY INSIGHTS

The GoSecure Cybersecurity Assessment Report is built around the Capability Maturity Model Integration (CMMI) to provide clear scoring against a target for categories within the evaluation making it easy to understand and share across your organization.

1 - Initial
Few Controls / Informal Strategies

2 - Managed
Developing

3 - Defined
Controls in Place / Formal Strategies

4 - Quantitatively Managed
Measurable Controls

5 - Optimizing
Controls measured and used for continuous improvement

CSA OPTIONS FOR EVERY ORGANIZATION

GoSecure offers three CSA options that are designed to meet the needs of any organization interested in proactively preparing to meet the challenges today's advanced attacks. We also recognize regular evaluation is the key to improvement. We recommend a program of regular assessment, testing and technology optimization for organizations that want the best outcomes for their security programs.

CSA Elite

√ Comprehensive review of security posture with highest level of detail within the categories
√ Creates the most thorough reporting

CSA Enterprise

√ Comprehensive review of security posture where some categories have been condensed to create a more focused effort
√ 1 Phase, 7 categories

CSA Essentials

√ Based on the CSA Enterprise, it delivers a streamlined review of security posture
√ Focuses on the categories relevant to the organization and their industry
